

Dear Qustodio Hiring Team,

I am excited to submit my application for the position of Frontend Intern at Octopus BI, a member of the Qoria family. I am a third-year undergraduate student in Computer Science with a strong interest in frontend development and a strong desire to learn and grow, and I am very excited at the prospect of working for a purpose-driven company that is making a real difference in the field of digital safety and education.

While I am not the most seasoned applicant, I'm a strong believer in consistent effort and continuous learning. I've built academic and personal projects using HTML, CSS, JavaScript, and React, and I'm eager to take these skills to the next level by learning from your experienced team. I also possess knowledge of RESTful APIs and Git and always try to apply best practices in code structure and collaboration.

What excites me most in this position is your commitment to leveraging technology for good—keeping children safe online and providing schools with actionable insights. I would be honored to be part of such meaningful work. Since my university lectures are scheduled mostly on weekends, I am available and keen to work full-time during weekdays in the office.

Thank you for taking the time to read my application. I would appreciate the opportunity to work for and learn from your team.

Warm regards,

W.A.Hirushi Divyanjalie
